WE ARE HERE TO GUIDE YOU THROUGH IT.

KATALINA KLEIN

PRESIDENT - FOUNDER

Active in the real estate industry for the last 19 years, Katalina saw the potential to bring to market, functional, attractive and affordable spaces by repurposing shipping containers into modern living and working environments. Passionate about finding innovative solutions for the home and business owner, she founded Kubed Living which is the synthesis of her experiences in real estate, design and business. Katalina holds an MBA and a California Real Estate License.

KUBED
LIVING

WHY KUBED LIVING?

WE UNDERSTAND THE UNIQUE CHALLENGES OF SHIPPING CONTAINER DESIGN & CONSTRUCTION

Kubed living is a modern & innovative full service design & project coordination company specializing in shipping container structures. Our focus is great design and meticulous coordination through all project phases. Our company was born out of the desire to create thoughtful, flexible and environmentally sensitive living spaces that maximize space and functionality and re-shaped to the lifestyle of the people living in them.

OUR SERVICES

THE DESIGN PACKAGE

DESIGN DOCUMENTS INDICATE BIG PICTURE DESIGN AND INTENT. OUR DESIGN PACKAGE INCLUDES THE FOLLOWING:

FEASIBILITY STUDY (Zoning codes, access, soil and topography)

CONCEPTUAL DESIGN (Where your vision is translated into Functional & aesthetically pleasing designs)

DESIGN DEVELOPMENT: Windows, doors as well as certain materials & fixtures are selected.

COST ESTIMATION

CONSTRUCTION DOCUMENTS

Construction documents describe the construction in detail and serve as a guide to those that will be constructing the project from the foundation & site-work to the joining of the actual shipping containers. The construction documents include full sets of structural engineering and building designs.

PROJECT COORDINATION

Our project coordination services are available to support our clients throughout the entire process - from design to move in.

HOW IT WORKS

CONSULTATION

(FREE OF CHARGE) EITHER OVER THE PHONE OR IN PERSON

To begin the design process, we will first need to discuss your vision and discuss your property.

BUDGET ESTIMATE

It is important that we understand your budget and expectations prior to beginning the design process.

THE DESIGN PACKAGE

WE START WITH THE DESIGN.

THIS IS WHERE WE TRANSLATE YOUR VISION INTO BIG PICTURE DESIGN AND INTENT.

DESIGN DOCUMENTS

THIS IS THE FUN PART.

Choosing to design with Kubed Living will be an engaging experience that ensures that your new structure design will be designed thoughtfully, creatively, & within your budget means. Our team is very experienced with container design. Kubed Living has designed over 50+ creative shipping container structures including container apartments, large & small custom container homes, gyms, offices, live work facilities, hotel units, business kiosks, greenhouses, wine bars, and many more. If you can dream it, we can make your vision a reality. Our team is straightforward and honest about what can and can't work so you can trust and rely on a design team that gives the extra effort to make sure that what is designed can be constructed.

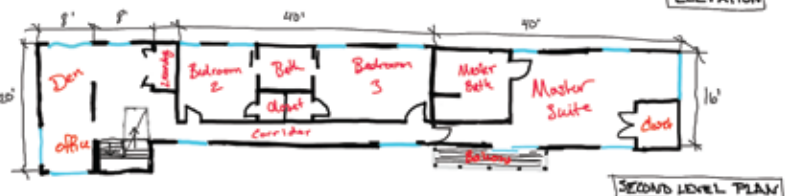

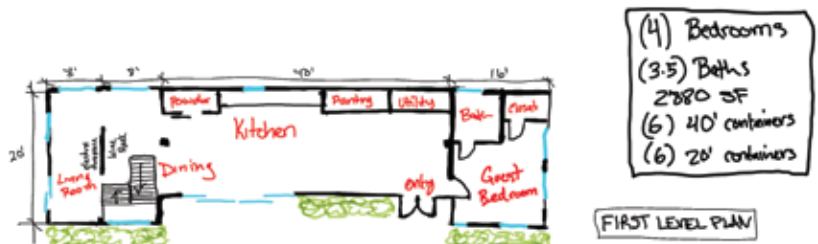

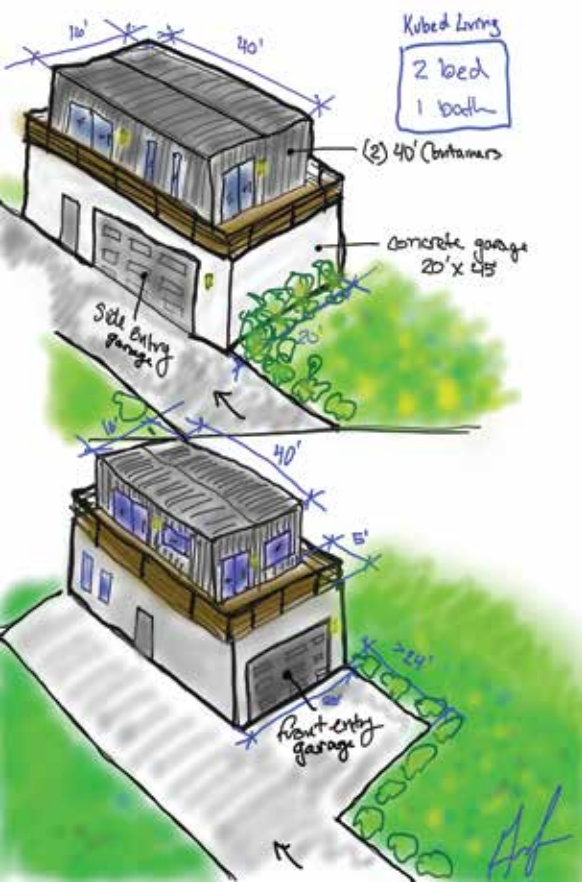

THE DESIGN DOCUMENTS WILL INCLUDE:

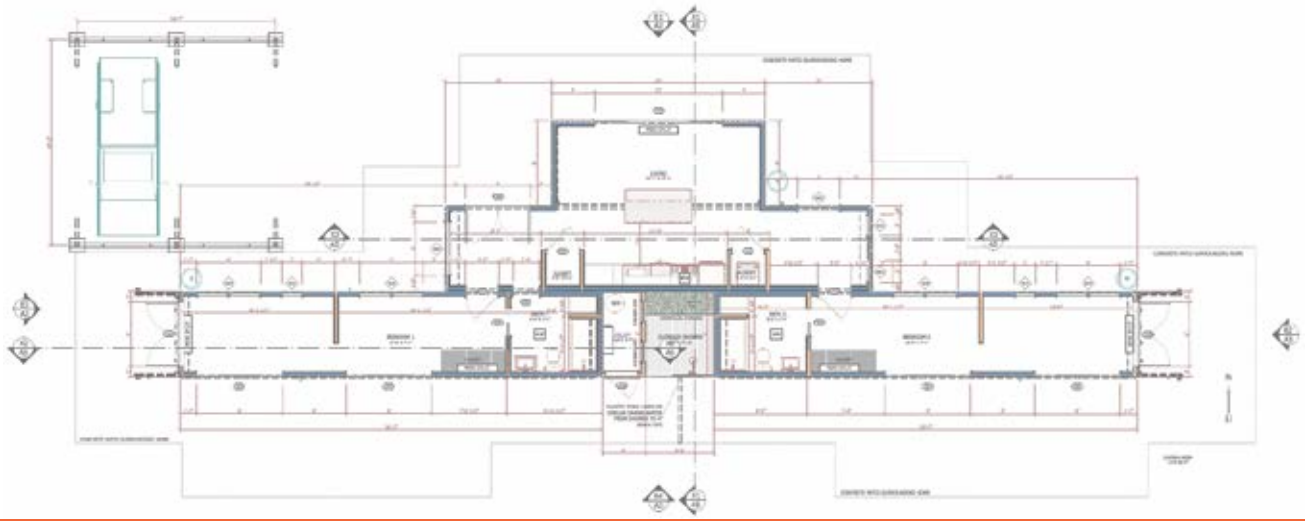

FEASIBILITY STUDY (Zoning codes, access, soil and topography)

CONCEPTUAL DESIGN (Where your vision is translated into functional and Aesthetically pleasing designs)

DESIGN DEVELOPMENT Windows, doors as well as certain materials and fixtures are selected

COST ESTIMATION

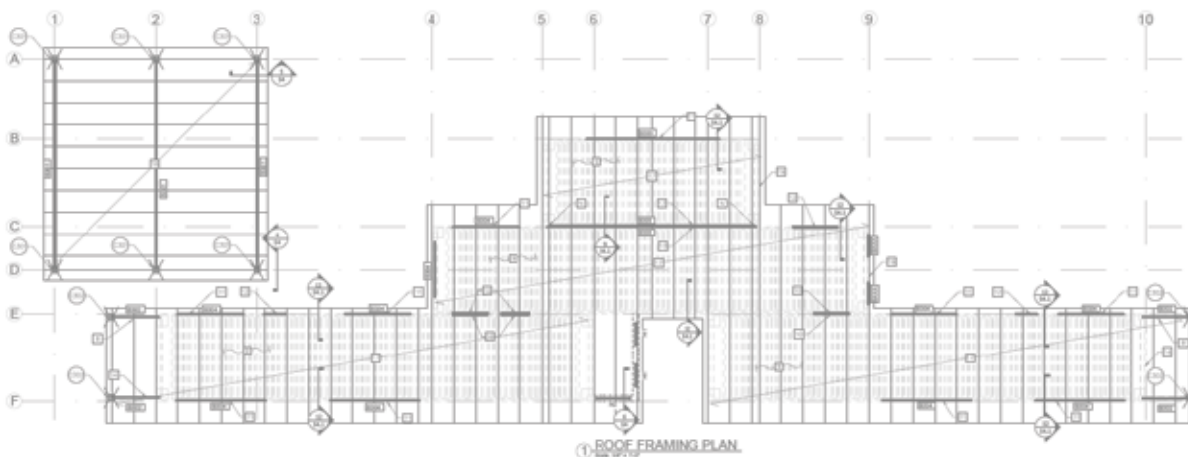

CONSTRUCTION DOCUMENTS

WHY THE DESIGN PACKAGE ALONE IS NOT ENOUGH TO BUILD YOUR HOME.

After developing the design package, we will have the direction & design intent of your build established. The next step will be to prepare construction documents that can be submitted to your local building department and simultaneously help guide those that will be constructing your project. Each state and local municipality have different sets of requirements that need to be adhered to. These requirements will all be made part of your construction documents.

BUILDING / ARCHITECTURAL / STRUCTURAL ENGINEERING PLANS

Our structural engineers are licensed in all 50 states. The engineer will be in charge of making sure that the structure and assembly of your structure is planned correctly. They are responsible for designing your foundation, roof, structural reinforcements & framing. Depending on your local municipality, you may need the stamp of a local architect as well. The builders also rely on the structural plans to create the shop drawings.

PROJECT COORDINATION

WHY IS THIS SERVICE IMPORTANT?

Executing the build of any structure requires the collaboration of many different trades & professionals. Working with shipping containers also brings on different sets of challenges that are not usually found in conventional builds. As part of our project coordination services, we help you navigate through the different stages of construction by facilitating the communication between the different groups involved (government agencies, suppliers engineers, consultants, contractors, etc...) in order to help make this process as smooth as possible.
